Preserve Calavera  
Coastal North San Diego County

## King Tide Event

Join our organizations as we help document the potential future from climate change as it impacts our coastline.

Meet at the parking lot at the South Carlsbad State Park just north of La Costa Avenue. We'll be near the bathrooms and beach.

This is an opportunity to see the impact of a king tide – a preview of what climate change will bring. Presenters will answer questions on climate change, sea level rise and habitat impacts.
